

Syed Ahmed Ali Shah

Software Developer — full-stack, blockchain & AI

ahmedalishah96@gmail.com · +92 301 2278148 · Sukkur, Pakistan · github.com/Ahmeds168 · linkedin.com/in/syed-ahmed-ali-shah-477936b4

SUMMARY

Software developer with 5+ years spanning web, mobile, and database-driven applications. Most recently a Development Fellow at Sukkur IBA University's Department of Electrical Engineering, managing OJS journal administration, departmental web systems, and office automation. Previously built Django/Flask and PostgreSQL solutions remotely for Clear Edge Technology (Canada). Holds a BS in Computer Science from Sukkur IBA University, with a blockchain-based voting system as a final-year project. Skilled in Python, JavaScript, Java, PHP, and Oracle/PostgreSQL administration, with growing expertise in prompt engineering, machine learning, and smart contract development.

SKILLS

Python, JavaScript, Java, PHP, Django, Flask, Solidity | PostgreSQL Admin, Oracle DB Admin, Web Development, Android Development, Desktop Apps | Blockchain, Prompt Engineering, Machine Learning | Communication, Management

EXPERIENCE

Development Fellow — Dept. of Electrical Engineering, Sukkur IBA University

Jun 2024 – Jul 2026 · Sukkur, Sindh, Pakistan

- Administered and upgraded the department's Open Journal Systems (OJS) installation
- Owned department website administration end-to-end
- Automated recurring office workflows and documentation

Software Developer — Clear Edge Technology

May 2021 – May 2024 · Canada (Remote)

- Built and maintained Django/Flask applications backed by PostgreSQL
- Developed interactive canvas features with Konva.js

Web Application Developer Intern — Vasona Systems International

Aug 2019 – Dec 2019 · Sukkur, Sindh, Pakistan

- Built features in .NET; handled website and email troubleshooting

PROJECTS

Decentralized Document Notary — Blockchain-based document notarization app (Solidity, React, Node.js, Supabase, Cloudflare R2) — deployed on Sepolia, Render & Vercel. doc-notary.vercel.app

On-Chain Voting dApp — Solidity (Hardhat) voting contract with a React + ethers.js frontend styled like an official paper ballot.

Groq Chat App — Full-stack chat app — Node.js/Express backend calling the Groq API, React (Vite) frontend.

Election System Using Blockchain (SISC) — Final-year project — permissioned blockchain voting system on Hyperledger Fabric via IBM Blockchain VS Code extension.

Analyzing Students' Mental Health — PostgreSQL-driven analysis of whether studying abroad affects student mental health.

Pet Recognition (CNN) — Convolutional neural network classifying cats vs. dogs at ~90% accuracy.

Campus Management Solution — Java + Oracle SQL system for storing student, teacher and course records.

Meshbook & Heart Disease Prediction — Meshbook — social website in PHP/HTML/CSS/JS/jQuery. Heart Disease Prediction — decision-tree disease risk model.

EDUCATION

BS, Computer Science — Sukkur IBA University, Sukkur (Aug 2016 – Aug 2021)

Intermediate — Islamia Science College, Sukkur (2012 – 2014)

CERTIFICATES

- Blockchain Basics — Cyfrin (Mar 2026)
- Solidity Smart Contract Development — Cyfrin (Aug 2026)
- Prompt Engineering with the OpenAI API — DataCamp (Jul 2026)
- Intermediate SQL — DataCamp (Aug 2026)
- Joining Data in SQL — DataCamp (Aug 2026)
- Working with Hugging Face — DataCamp (Aug 2026)
- Vasona Systems International — Internship Certificate (2019)

ACHIEVEMENTS & LANGUAGES

Won Aptech Web Development Challenge (Nov 2017 – Feb 2018)

Languages: English (Full Professional), Urdu (Native), Sindhi (Native)
